

PressCane Limited's distillery is strategically located in Chikhwawa Malawi. The Company produces and sells two grades of Ethanol namely: Fuel Ethanol and Rectified Spirit.

PressCane Limited's products are manufactured in compliance with stringent standards of plant operations, quality and safety. The company's operations are closely monitored; this facilitates a high degree of control over its production ensuring high quality products.

PressCane Limited's market is both local and export. The local market largely comprises of the petroleum companies, as well as the medical industry. Historically the company has been exporting to Tanzania, Uganda, DR Congo, Zambia and Mozambique. PressCane Limited has traditionally looked to leverage the export potential of its products. The company has initiated the process of aligning to emerging exports trends and is continuously in the process of establishing facilities and operations that are in compliance with best manufacturing practices.

PressCane Limited always strive to achieve excellence through proactively addressing customer needs and requirements. Integral to this approach is the identification and development of customized solutions to our varying customer needs.
